11:55 Q&A Panel Session
12:20 Launch
12:30 Lunch
13:30 Close

Climate change is one of the greatest challenges facing our society. Here in Yorkshire and Humber we are uniquely exposed to the threats and opportunities a changing climate will bring.

The revision of the Climate Change Plan for Yorkshire and Humber and the completion of the Regional Adaptation Study mark a major milestone in the drive to better understand the challenges for tackling climate change in the region. The Climate Change Plan will give the region clear direction in addressing climate change issues, while the Adaptation Study places its focus more firmly on climate changes already underway, and how, as a region, we address them.

These complementary pieces of work signal our determination to work across traditional boundaries to ensure we are resilient and to accelerate action to deliver a sustainable and low carbon future for Yorkshire and Humber.

Don't miss your opportunity to learn more, find out how your organisation can get involved and discover what help and advice is available.

A full programme containing details of the conference speakers will be issued to delegates prior to the event.
